

Hero Cinematic — Storyboard

Laqta / ■■■■ landing page • FPV drone flight through Saudi landmarks, cloud-linked • scroll-scrubbed (Apple-style)

The idea: one continuous FPV drone flight. The camera dives through each Saudi landmark, then **climbs up into cloud/sky** and emerges descending into the next — so there are no visible cuts, just a magical hop between places. **Scroll drives the camera** (scroll down = fly forward). Energy **builds calm** → **energetic**.

✈️ **Airplane-window bookend:** the film OPENS at an airplane window above the clouds (scene 00); on scroll the camera **pushes through the glass** and the frame falls away into full-bleed flight — so your footage plays full-screen for the whole journey. The window **returns at the finale** as we descend into Riyadh, closing into the logo + CTA.

■ **Light:** landmarks are shot in **MORNING light**. Three deliberate **NIGHT** scenes: **Makkah** and **Madinah** (lit, reverent, spiritual) and the **Riyadh** finale (modern, electric) — the night block becomes the emotional peak.

Each scene is built in **two approval stages**: **(1) real multi-angle reference photos** → **an AI still you approve**, then **(2) the video**. Nothing is animated before you sign off on the look.

■ **Religious landmarks (Makkah & Madinah):** treated with reverence — a slow, respectful aerial, **never an FPV racing move**. AI-generating the Kaaba / Holy Mosques is religiously sensitive and technically risky, and drones are banned over the Haramain. **Recommendation:** use **REAL** licensed footage for these two scenes, not AI. Decision needed from you (see last page).

The look — “cinematic golden light”

Every scene is graded to stop the scroll. The **sky is a character** (dramatic clouds, dust/mist catching light); **god-ray light beams** break through haze and canyons; shot at **golden hour & blue hour** with rim-lit edges, gentle bloom and lens flare; **volumetric atmospheric depth** (haze, floating dust, birds); a **filmic teal-orange grade** (warm highlights, cool shadows, deep blacks). Motion mixes **majestic slow reveals with FPV energy**, settling into a hero beat exactly as the light peaks. **Rule: every scene has ONE light moment** — sun cresting a dune, rays through Hegra, the fountain lit at blue hour.

Feel Saudi in every shot: each scene carries a specific cultural touch (a person in traditional dress, a craft, a ritual) — see the CULTURE line on each panel below.

The flight — scene by scene

00

Airplane window — arrival

OPENING BOOKEND · the journey begins

SHOT	Looking out through an airplane window at dawn. Thick cloud tops below catching first gold light; the Saudi coast/desert appearing far beneath through a break in the cloud.
FPV MOVE	Slow drift past the window. On scroll the camera PUSHES THROUGH the glass — the window frame expands, edges fall away, and the view opens to full-bleed sky.
CULTURE	★ <i>The passenger's hand, a boarding pass, a glimpse of a thobe sleeve — you are arriving in Saudi Arabia.</i>
TRANSITION	■ Push through the window into open cloud (frame dissolves).
LIGHT / MOOD	Dawn above the clouds — soft gold on cloud tops, cool blue above.
ON-SCREEN	رحلة تبدأ من السماء أهلاً بك في المملكة.

01

AIUla — Hegra & Elephant Rock

Desert heritage · ICONIC OPENER

SHOT	Sunrise over sandstone. Nabataean tombs of Hegra; Elephant Rock arch; palm oasis. God rays through the rock gaps.
FPV MOVE	FPV skims low over the oasis, banks up around Elephant Rock, pulls back to reveal the tomb field, then climbs skyward.
CULTURE	★ <i>A lone figure in white thobe & ghutra stands on a ledge, robe catching the wind.</i>
TRANSITION	■ Climb straight up into a bright morning cloud (white-out).
LIGHT / MOOD	Dawn golden hour — warm, hazy light beams, long shadows.
ON-SCREEN	من قلب الجزيرة العربية لقطات سعودية بجودة سينمائية.

02

Empty Quarter — Rub' al Khali

Desert

SHOT	Endless golden dunes at first light, wind lifting sand off the crests catching the sun.
FPV MOVE	Descend out of cloud fast down a dune face, swoop along the crest past the caravan, then bank up again.
CULTURE	★ <i>A Bedouin camel caravan crests a dune casting long shadows; a falconer with a hooded falcon.</i>
TRANSITION	■ Rise into a thin high haze that whites out.
LIGHT / MOOD	Early morning — vast, minimal; blowing sand glows in low sun.
ON-SCREEN	صمت الصحراء الربع الخالي... اتساع لا ينتهي.

03

Edge of the World (Jebel Fihrayn)

Cliffs · near Riyadh

SHOT	Sheer 300m cliff edge dropping to an ancient seabed plain to the horizon; haze layers stack into the distance.
FPV MOVE	Burst from cloud over the plain, race toward the cliff, pull up hard over the edge for a vertigo reveal.
CULTURE	★ <i>A man in a flowing bisht cloak stands at the cliff edge, silhouetted against the light.</i>
TRANSITION	■ Punch straight up over the rim into cloud.
LIGHT / MOOD	Mid-morning — epic scale, atmospheric depth, sun flare over the rim.
ON-SCREEN	على حافة العالم طوبق... حيث تنتهي الأرض.

3b

Qasr al-Farid — Hegra, AIUla

Desert heritage · NEW (discovered)

SHOT	The lonely unfinished Nabataean tomb carved into a single standalone sandstone monolith, isolated on open desert sand.
FPV MOVE	Rise out of cloud to reveal the monolith standing alone; orbit slowly around its carved facade, then climb away.
CULTURE	★ <i>A lone figure in a dark abaya or white thobe walking past its base, giving the true scale of the monolith.</i>
TRANSITION	■ Climb into a bright morning cloud.
LIGHT / MOOD	Morning — warm low sun on the carved facade, long shadow across the sand, light haze.
ON-SCREEN	القصر الفريد الحجر... تحفة نحتت في الصخر.

05

The Red Sea — coast & islands

Sea

SHOT

Turquoise water, coral reefs, white-sand islands; sun glittering off the surface (sun-glint).

FPV MOVE

Dive out of cloud toward the water, skim the surface over a reef, bank around an island, climb over the shallows.

CULTURE

★ *A traditional wooden sambuk boat with a fisherman casting nets.*

TRANSITION

■ Climb into a bright sea-sky cloud.

LIGHT / MOOD

Late morning — bright, colourful; sparkling sun-glint and soft flare.

ON-SCREEN

ساحل بلا حدود
البحر الأحمر بعدسة عربية.

06

Makkah — Al-Masjid al-Haram

Religious · NIGHT · REVERENT

SHOT

The Holy Mosque and the Kaaba at its centre, courtyard glowing gold at night, worshippers circling; the lit city and towers around.

FPV MOVE

SLOW, reverent high aerial — a gentle descent and hold, NO fast FPV. Steady, respectful, still.

CULTURE

★ *Worshippers circling in unity — the human devotion IS the shot. Reverent, real footage.*

TRANSITION

■ A soft, slow dissolve upward into the night sky (gentle, not a dive).

LIGHT / MOOD

NIGHT — courtyard ablaze with golden light, moon above, city lights around. Reverent.

ON-SCREEN

قلب العالم الإسلامي
مكة المكرمة.

08

Diriyah — At-Turaif

Heritage city

SHOT

Mudbrick heritage district in morning sun, narrow shaded alleys, palm groves along Wadi Hanifah; warm ochre walls.

FPV MOVE

Descend out of cloud over the palms, thread the narrow alleys, rise over the mudbrick rooftops.

CULTURE

★ *An Ardah sword dance in a courtyard; Arabic coffee poured from a dallah into finjan cups.*

TRANSITION

■ Climb into a bright morning cloud.

LIGHT / MOOD

Morning — warm ochre mudbrick, crisp shadows, intimate.

ON-SCREEN

حيث بدأت الحكاية
الدرعية والطين الذي صنع تاريخا.

09

Jeddah — Al-Balad & Corniche

Coastal city

SHOT

Historic Al-Balad coral houses with carved mashrabiya in morning light; the Corniche and King Fahd Fountain jetting high, spray catching the sun.

FPV MOVE

Fly the old-town rooftops, out over the Corniche, arc around the sunlit fountain plume.

CULTURE

★ *Hejazi old-town life — carved roushan windows, a spice/gold souq, a man in a Hejazi cap.*

TRANSITION

■ Rise into a bright sea-morning cloud.

LIGHT / MOOD

Morning — textured coral facades, sparkling water, rainbow in the spray.

ON-SCREEN

عروس البحر الأحمر
جدة... تاريخ يطل على الماء.

10 Riyadh — KAFD & Kingdom Tower Modern city · ENERGETIC PEAK → CTA	SHOT	Night skyline — the Kingdom Tower's sky-bridge, KAFD towers lit, traffic light-trails, Boulevard energy; bloom & flares.
	FPV MOVE	Rocket up between the towers, race the skyline, sweep toward the Kingdom Tower — peak energy — then the airplane window frame RETURNS around the view (descending to land).
	CULTURE	★ <i>Modern Saudi youth on the Boulevard; green National / Founding Day flags.</i>
	TRANSITION	■ CLOSING BOOKEND: window frame closes in → gold '■■■■' logo forms in the light → CTA.
	LIGHT / MOOD	NIGHT — the ONLY night scene; bold neon bloom, light-trails, lens flare. The payoff after nine morning scenes.
	ON-SCREEN	نحو المستقبل الرياض — عاصمة اللقطة. تصفح الألبومات.

What I need from you to approve this storyboard

1	Approve or edit the scene list & order above (add / drop / reorder landmarks).
2	Madinah (scene 07) — include both Holy Mosques, or Makkah only? (Reverent, real footage either way.)
3	Religious scenes: confirm real licensed footage (recommended) vs attempt AI. If real footage, we'll source/licence it.
4	Total length: 10 scenes is on the longer side. Keep all 10, or trim to ~8 for a tighter, cheaper flight?
5	Then I render Scene 01 (AlUla) still from a real reference for your approval — stage 1 of the 2-stage process.

References we'll gather per scene (to make each look 100% real): an actual photo of the real landmark — preferably licensed/owned or official tourism / Wikimedia — used to ground the AI still so it matches the true place. Religious scenes: real footage only.
