

Hero Cinematic — FINAL Storyboard

Laqta / ■■■■ landing page • scroll-scrubbed flight through Saudi Arabia • approved stills, final running order

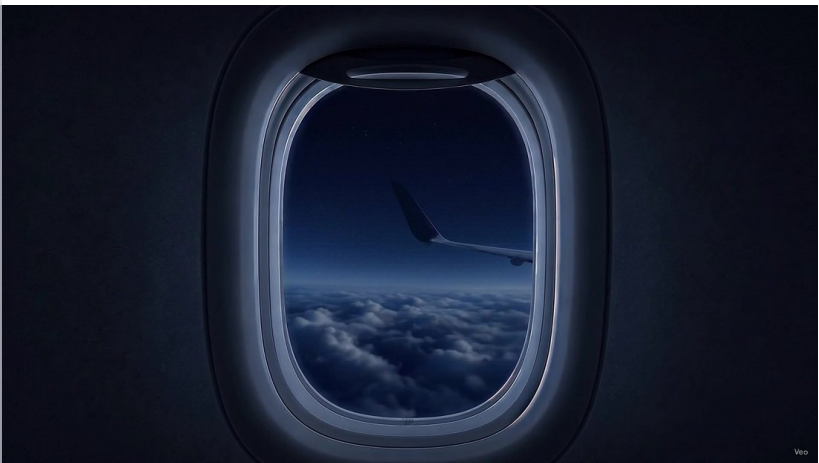

The arc — an overnight arrival. The film mirrors a real overnight flight into Saudi Arabia. It opens at an airplane window at **NIGHT**; the camera pushes through the glass into dark cloud and emerges over the two lit cities — **Riyadh**, then **Makkah** as the emotional peak of the night. Rising away from Makkah the cloud fills the frame and, hidden inside that vapour, **the light lifts from deep blue to dawn gold**. We emerge into **MORNING** for the natural wonders (AlUla → Qasr al-Farid → Empty Quarter → Edge of the World → Red Sea → Diriyah → Jeddah), and finally return **INSIDE** the cabin at the **morning window**, where the frame reforms around the view and closes into the logo and CTA.

THE TRANSITION RULE — every scene is joined by a cloud wipe. At the end of each shot the camera climbs or pushes forward into vapour until the cloud **completely fills the frame**. That full-frame white/dark cloud is the wipe: the next shot begins inside the same vapour and pulls back to reveal the next landmark. Because the frame is fully covered at every join, there is never a visible cut — and it is what lets the night→morning change happen invisibly.

Lighting run — dawn → morning → golden → **transition** → night

The film, in order

00

Airplane window — NIGHT

NIGHT

TRANSITION

CLOUD WIPE: camera pushes toward the glass; the window frame expands past the edges of frame.

ON-SCREEN

رحلة تبدأ من السماء
أهلاً بك في المملكة.

01

Pushed through the window

NIGHT

TRANSITION

Frame is now fully outside — wing, stars, moonlit cloud. Camera dives toward the cloud deck.

ON-SCREEN

فوق الغيوم
ليل فوق المملكة.

02

Inside the night cloud

NIGHT

TRANSITION

Dark vapour COMPLETELY FILLS THE FRAME — the wipe that carries us to the first city.

ON-SCREEN

بين السحاب
نقترب...

03

Riyadh — Kingdom Tower

NIGHT

TRANSITION

Climb until dark cloud covers the frame entirely, then move on.

ON-SCREEN

نحو المستقبل
الرياض... عاصمة لا تنام.

04

Makkah — Al-Masjid al-Haram

NIGHT · peak

TRANSITION

★ THE TRANSITION. Rise into cloud until the frame is filled — inside the vapour the light lifts from deep blue to dawn gold.

ON-SCREEN

قلب العالم الإسلامي
مكة المكرمة.

05

Dawn breaks inside the cloud

DAWN · transition

TRANSITION

★ The same cloud, now lit gold. Time has passed invisibly. We emerge into MORNING.

ON-SCREEN

يشرق الفجر
صباح جديد.

06

AlUla — Elephant Rock

MORNING

TRANSITION

Rise from the arch until cloud fills the frame.

ON-SCREEN

من قلب الجزيرة العربية
لقطات سعودية بجودة سينمائية.

07

Qasr al-Farid — Hegra

MORNING

TRANSITION

Orbit the monolith, climb into cloud until covered.

ON-SCREEN

القصر الفريد
الحجر... تحفة نحتت في الصخر.

08

Empty Quarter — desert lake

MORNING

TRANSITION

Cloud parts to reveal the oasis, then closes back over the frame.

ON-SCREEN

صمت الصحراء
الربع الخالي... اتساع لا ينتهي.

09

Edge of the World

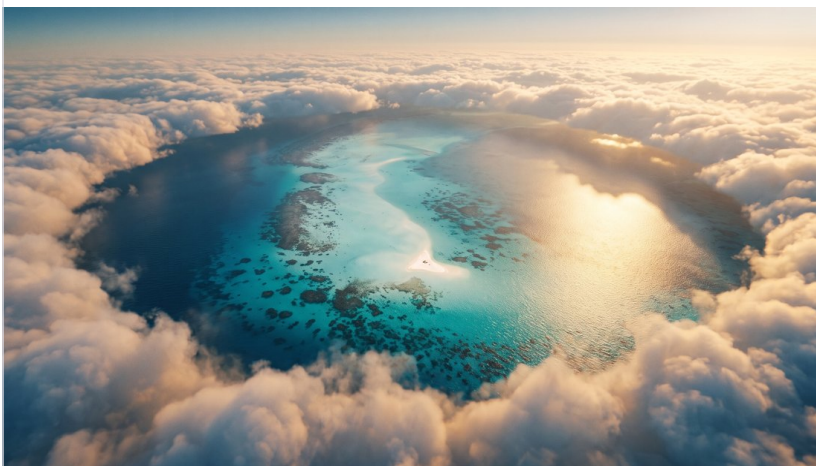

MORNING

TRANSITION

Sweep past the plateau, pull up over the rim into full-frame cloud.

ON-SCREEN

على حافة العالم
طويق... حيث تنتهي الأرض.

10

The Red Sea — coast & islands

MORNING

TRANSITION

The cloud ring closes over the lagoon and fills the frame.

ON-SCREEN

ساحل بلا حدود
البحر الأحمر بعدسة عربية.

11

Airplane window — MORNING

MORNING · FINALE

TRANSITION

CLOSING BOOKEND: emerge from cloud
back INSIDE the cabin — the window frame
reforms → gold ■■■■ logo → CTA.

Next stage — the video

- 1. Seedance video prompts.** Each approved still becomes the START FRAME of an image-to-video clip: the camera flies through the scene and climbs into cloud at the end.
- 2. Frame-locked seams.** Each clip's LAST frame is extracted and fed as the NEXT clip's start image — that is what makes the joins invisible.
- 3. The day→night transition** happens INSIDE the Jeddah→Makkah cloud: the vapour starts gold and ends deep blue, so the change of time reads as natural and motivated rather than as a cut.
- 4. Encode & wire** into the Arabic RTL scroll engine, QA every seam, deploy.
