

Stock Footage Portal

Arabic-first stock footage marketplace (Artist-style) • album one-time purchase + creator marketplace

- Egypt-registered, Arab audience

Progress tracker — updated 2026-08-02

■ YOU ARE HERE

Phase 1 · Step 1.3 — render the AI cinematic. The Arabic page shell is BUILT and running locally (6 Saudi scenes, full RTL, SEO, real scroll-scrub with placeholder clips, desktop + mobile). **One blocker:** run **hf auth login** so we can generate the real photoreal scenes to replace the placeholders.

Legend: [x] DONE [~] NOW [] to-do [!] blocked

PHASE 0 · Decisions locked

Status	Task	Notes
[x] DONE	Business model: album one-time purchase, no subscription	Album is the only SKU at launch
[x] DONE	Marketplace + commission (you keep %, creator gets rest)	Suggest 30% platform take
[x] DONE	Buyers: Saudi + Arab (agencies/gov + solo creators)	
[x] DONE	Creators: worldwide, Egypt-first at launch	Payoneer/Wise + Instapay payouts
[x] DONE	Company registered in Egypt (tax number, online selling)	Egyptian ETA e-invoicing, not Saudi ZATCA
[x] DONE	Exclusivity: non-exclusive + 5pt bonus for exclusives	
[x] DONE	Refund policy: no refund after download	Disclose at checkout
[x] DONE	Scope confirmed: Saudi-focused journey (Arab-expandable)	Riyadh, AlUla, Red Sea, Empty Quarter, Diriyah

PHASE 1 · Arabic scroll-animated landing page (CURRENT FOCUS)

Immersive 'fly through the world' scroll page (scroll-world skill). Arabic-first, full RTL, SEO. Build the page shell first with placeholders (free), then render the AI cinematic (uses Higgsfield credits).

1.0 Setup & access

Status	Task	Notes
[x] DONE	Confirm tooling: ffmpeg, Python/PIL, Node, reportlab	All present
[!] blocked	Higgsfield login — run hf auth login (only you can)	Session expired; needed to render scenes/video
[] to-do	Confirm Higgsfield credit balance for the render chain	~6 stills + ~6 videos x2 (mobile); est. after login
[x] DONE	Decided: desktop + mobile (native 9:16)	~2x render cost, accepted

1.1 Creative direction (DONE)

Status	Task	Notes
[x] DONE	Brand: Laqta / ■■■■, gold+night+sand palette, premium tone	Rename trivial (config-driven)
[x] DONE	Art direction: photoreal cinematic	On-brand for a footage library
[x] DONE	Camera: continuous walkthrough (architecture A)	Legs chain forward, no connectors

Status	Task	Notes
[x] DONE	Journey: 6 Saudi scenes	Riyadh > AlUla > Red Sea > Empty Quarter > Diriyah > Studio
[x] DONE	Arabic copy per scene: eyebrow, headline, body, tags, CTA	Drafted; refine anytime

1.2 Build the page shell (DONE — live locally with placeholders)

Status	Task	Notes
[x] DONE	Scaffold + scroll-scrub engine wired	landing/index.html + scrub-engine.js
[x] DONE	Full RTL layout + IBM Plex Sans Arabic	Copy right, route rail left, counter LTR-fixed
[x] DONE	Arabic SEO: title, meta, OG/Twitter, hreflang, JSON-LD	WebSite + Organization schema
[x] DONE	6 sections + Arabic copy + placeholder stills/clips	Ken Burns clips scrub for real; notify-me capture

1.3 Render the cinematic (uses Higgsfield credits)

Status	Task	Notes
[] to-do	Generate N scene stills (one per location), one style	Review cohesion before video
[] to-do	Generate dive clips + connectors, frame-locked seams	The seam rule = no visible cuts
[] to-do	Extract frames, encode for smooth scrubbing (ffmpeg)	Native res, small GOP, blob-seek
[] to-do	Swap placeholders for real clips; QA every seam	Headless screenshots at each seam

1.4 Ship

Status	Task	Notes
[] to-do	Mobile QA (if opted in) + reduced-motion fallback	
[] to-do	Deploy landing page + connect domain	Hosting TBD
[] to-do	Add email capture / 'notify me at launch'	Start building an audience early

PHASE 2+ · The full portal (after landing page)

Summarised here; detailed in build-steps.md. Not started until the landing page is live.

Status	Task	Notes
[] to-do	Catalogue: video upload + watermarked previews + safe masters	Hardest engineering
[] to-do	Buyer side: search/filter, clip page, album page, checkout, library	People search clips, buy albums
[] to-do	Payments: Paymob/Fawry/Kashier + ETA e-invoice	Cards incl. Saudi buyers
[] to-do	Creator side: apply, upload album, earnings, payouts	Egypt-first onboarding
[] to-do	Admin: review queue (approve every album), orders, payouts	Quality + permits gate
[] to-do	Seed 3-5 albums (~50 clips) before opening to creators	Never launch empty
[] to-do	Soft launch > fix content gaps > public launch	

Next 3 actions

1	Open the shell yourself: python3 -m http.server 8777 --directory "landing" then visit localhost:8777 in your browser (scroll to fly through it).
2	Run hf auth login in your terminal (interactive OAuth — only you can) so we can render the real photoreal scenes.
3	I generate the 6 photoreal Saudi scenes + video, frame-lock the seams, and swap them in for the placeholders. Then QA + deploy.

This PDF is regenerated as we progress — statuses update, the 'YOU ARE HERE' banner moves, and completed items flip to DONE.
